## DUO-BACK® - 'DYNAMIC SEATING'

The perfect backrest has to fulfil two apparently contradictory criteria: It should not only support the upper body and take over the functions of the muscles which support the back; but also follow and facilitate the movements of the upper body.

The resultant 'dynamic sitting' stimulates the muscles, helping to prevent back strain or alleviate existing pain. Just as importantly, this stimulation retards the natural build-up of muscle tension, helping to lessen the effects of tiredness.

The unique split back pads of the 'Duo-Back®©' are positioned halfway between the top and bottom of the spine so that when reclined the lower sections of the pads move forward straightening the spine and pelvic girdle. This is a vital point often stressed by both back specialists and office ergonomists.

Height adjustable, the backrests correctly support the back of any person. The space between the pads allows the spine to move freely. Instead of putting pressure on the spine, support is evenly distributed throughout the back muscles.

The backrests are pivotally mounted enabling them to move in all three axes – forwards and backwards; up and down and left to right. It means that the back is fully supported in all positions. Uniquely, the mountings provide the back with 'active support'. The shape and mobility of the backrests ensures that they follow the contours of the back as it moves, varying the support needed and stimulating muscle tone and blood circulation.

**Duo-Back© is office ergonomics perfectly applied.**

Press and hold this button, raise or lower the arm rest to the desired and release the button.

### **8. ARMREST WIDTH AND DEPTH ADJUSTMENT \*\***

Loosening these locking levers (½-1 turn) will enable you to adjust the armrest width by swiveling the pad in or out and in depth by sliding the pad back and forth. Re-tighten the locking lever when you have found a position that you find supportive and comfortable.

Additional width adjustment can be achieved by loosening the bolts on the underside of the seat at the point where the armrest affixes to the seat pan.

## SYNCHRON 7 DUO-BACK® - CHAIR ADJUSTMENTS

### 1. SEAT HEIGHT

To Raise the chair in height lift this lever whilst unseated. To Lower the chair in height lift this lever whilst seated.

### 2. SYNCHRONOUS ADJUSTMENT

By raising this lever up the chair mechanism will be in free float. To lock the synchronous mechanism simply find a position you are comfortable with and push down on the lever to lock it off.

### 3. ERGOLAST® WEIGHT TENSION CONTROL

By turning the knob anti-clockwise when seated you will increase the level of resistance to the synchronous action of the chair and by rotating it clockwise, the resistance is reduced. Adjust to suit your body weight.

### 4. BACK REST RAKE ADJUSTMENT

Turn this wheel anti-clockwise about 1-1½ turns. Lean against the back rest of the chair and the back will move back independently of the seat. Once a desirable position is found, tighten the wheel to lock the back in position. Or, alternatively, leave the back in free-float.

### 5. BACK REST TENSION ADJUSTMENT

This control enables the back rest movement to adjust to individual body weights. Use in conjunction with position 4.

Turn anti-clockwise to increase tension and clockwise to decrease tension.

### 6. SEAT DEPTH ADJUSTMENT

Turn this wheel anti-clockwise about 1-1½ turns to loosen the mechanism. This allows the backrest to slide back, thus creating a deeper seat to backrest depth. Adjust to leg length, remember to leave approximately 4cms of space between the front of the seat and the back of the knees. Re-tighten the mechanism by turning the wheel in a clockwise direction.

### 7. DUO-BACK® BACKREST PAD ADJUSTMENT

To adjust the height of the backrest pads, undo and remove the wheel and bolt. Set the backrest to the desired height and re-fit bolt and tighten the wheel.

#### Height adjustment:

To adjust the neck rest in height, depress the button and raise or lower the mechanism until the desired height is achieved. Release the button to lock in place.

#### Depth adjustment:

You can increase or decrease the depth of the neck rest by moving the cushion backwards or forwards at the two pivot points. These are friction based and there are no levers or buttons involved in this particular adjustment.

### 9. ERGO-ARM® ARMREST ADJUSTMENT (OPTIONAL FEATURE)

#### Height adjustment:

To adjust the armrests in height, depress the button and raise or lower the arms until the desired height is achieved. Release the button to lock in place.

#### Depth & Width adjustment:

Underneath the oval top section of the armrest you will find a little locking lever, if you loosen off this lever you will be able to move the top pad of the armrest through 360 degrees and can also slide it back and forth. Position the armrest pad so that your arms are in a natural and relaxed position whilst being supported on the armrests of the chair. Once you have made the adjustment lock the pad in place by re-tightening the locking lever underneath.
