Freework Mechanism:-

The Xenium Freework mechanism provides multi directional movement from the seated position. The direction and flow of the mechanism is adjusted by the body's motor function. By shifting the emphasis and positioning of your body weight the mechanism will adjust with you. Resistance to this movement can be semi locked off if desired. Weight tension adjustment ensures that the movement can be set to each individual's preferences. Suitable for users of 45 - 125kg in weight.
