

# Grahl Flip

Flip is a lightweight and mobile chair range which is incredibly flexible. Flip up seats and optional folding armrests mean that they can easily be nested or stacked when not in use which saves you valuable space.

Available with or without folding armrests and with the option of a folding writing tablet, Flip lends itself to use in training rooms, meeting rooms and multiple use spaces.

Flip is made from Aluminium and is powder finished in Silver. It has a rubber hinged polypropylene backrest offering up to 16° of back rest tilt.

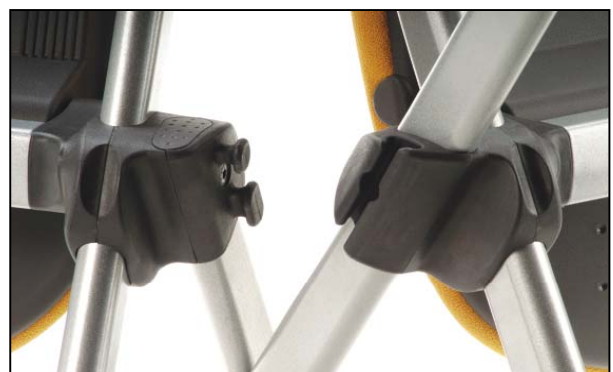

Flip can be stacked vertically or nested horizontally. Optional castors aid ease of movement.

Optional linking plates allow flip chairs to be interlocked with one another.

(A chair with two armrests can only be linked with a chair without armrests)
